

Centralized Multi-Branch Gym Management System

A unified platform connecting all branches under one head-office view.

PREPARED FOR	The Management / Owner, Fitness Synergy Attention: Ms. Ellen Geronimo, Operations Manager
PREPARED BY	M.G.A.B. Co. — Marco Andrei R. Belen (Lead Developer) and team

1 The Vision

Each branch operates its own day-to-day system — registering members, logging walk-ins, and recording payments. Meanwhile, the **head office sees everything in one place**: consolidated sales, attendance, and membership across all branches, with the ability to verify and oversee each branch's records from a single dashboard. One source of truth for the whole company.

2 What It Delivers

- **Per-branch operations** — each branch runs independently with its own staff accounts
- **Head-office oversight** — one consolidated dashboard across all branches
- **Role-based access** — branch staff see only their branch; management sees everything
- **Consolidated reporting** — company-wide sales & attendance, plus per-branch drill-down
- **Verification workflow** — head office can review and confirm branch records
- **Full accountability** — every action logged per user, per branch

3 A Phased, Low-Risk Approach

Rather than building everything at once, we recommend a phased rollout so you see results — and value — at each step before committing further.

PHASE 1 Foundation

₱70,000 – ₱110,000

- Multi-branch architecture with secure data separation
- Staff accounts & role-based access (branch staff / manager / head office)
- Existing Lipa branch migrated into the new system

PHASE 2 Head-Office Dashboard

₱50,000 – ₱80,000

- Consolidated company-wide reporting with per-branch drill-down
- Branch record verification workflow for management

PHASE 3 Branch Rollout

₱12,000 – ₱18,000 / branch

- Onboarding and setup for each additional branch
- Staff training per branch

Ongoing Platform Service — ₱1,500 – ₱2,500 / branch / month

Covers business-grade hosting, security updates, backups, and priority support for every active branch.

4 Recommended Starting Point

Start with a 2-branch pilot. Prove the system works across branches before rolling out company-wide. It's the safest, most cost-effective way to begin — low commitment, real results.

5 Next Step

A short **discovery session** lets us map your exact branches, staff roles, and verification rules so we can finalize a precise quotation. We'd be glad to schedule one at your convenience.

Figures above are indicative ranges for planning purposes and are finalized after the discovery session. This document is a concept & roadmap, not a fixed quotation.
